About MGC

Mahira Group of Companies, founded in 2018 by Mr. Javed Saifi, has grown into a trusted name in construction, flooring services, and sports ground development. Under his leadership, the company has built a strong reputation for delivering high-quality infrastructure solutions.

Our Mission

To revolutionize sports and recreational infrastructure by delivering innovative, durable, and high-performance solutions. Through expert craftsmanship, advanced fabrication, and sustainable practices, we strive to create safe and inspiring spaces that elevate experiences and consistently exceed client expectations.

Our Vision

To be a globally recognized leader in sports infrastructure and fabrication, driving innovation, quality, and sustainability to create world-class recreational and sports environments.

Who We Are

MGC Global is at the forefront of India's sports infrastructure industry, leading the way with an innovative and cutting-edge approach. The company is committed to building world-class infrastructure that exceeds expectations.

Driven by a strong dedication to quality and a passion for creating exceptional athletic facilities, MGC delivers projects that inspire performance and elevate sporting standards across every level.

Our Services

Our experienced consultation team has successfully supported the development of various facilities essential for strong sports infrastructure. We provide highly competitive and professional turnkey solutions tailored to client needs.

MGC also offers annual maintenance contracts to ensure comprehensive upkeep and long-term performance of all installed facilities, delivering reliable and continuous support.

Our Flooring Solutions

- Football Turf Flooring
- Multi Turf Flooring
- Astro Turf Flooring
- Lawn Grass Flooring
- Wooden Flooring
- Synthetic Acrylic Flooring
- EPDM Flooring
- Vinyl Flooring
- PP Tiles Flooring
- Rubber Flooring

Football

Football is a sport that demands precision, durability, and safety in its playing surfaces. Our company specializes in designing and constructing high-quality football fields that meet international standards.

Whether it is natural grass, hybrid turf, or advanced synthetic surfaces, we ensure optimal playability, efficient drainage, and long-term performance, delivering safe and professional-grade football infrastructure.

Tennis

Precision and consistency are key in tennis, and we specialize in building exceptional courts designed for performance and durability. Whether you require hard courts, clay courts, or synthetic grass surfaces, we provide expert solutions that cater to both professional and recreational players alike.

Basketball

We design and construct high-quality basketball courts that offer excellent durability, surface performance, and player safety. Our courts are built to ensure optimal grip, consistent bounce, and long-lasting playability for both professional and community-level use.

Badminton

Badminton requires a well-constructed court with a perfectly smooth surface to ensure fast-paced, accurate gameplay. We specialize in designing and building high-quality badminton courts for both indoor and outdoor settings, catering to recreational and professional standards.

Hockey

Hockey is a high-speed, impact-driven sport that requires a perfectly engineered playing surface. We specialize in constructing world-class hockey fields using advanced synthetic turf systems, including water-based and sand-dressed surfaces.

Our solutions ensure optimal ball control, enhanced player safety, and long-term durability, delivering professional-standard performance for all levels of play.

Athletic Track

Speed, shock absorption, endurance, and performance define athletics, and we specialize in constructing high-quality athletic tracks that enhance all these elements.

Our tracks are designed to provide superior traction, durability, and safety, ensuring an optimal surface for sprinters, long-distance runners, and field event athletes.

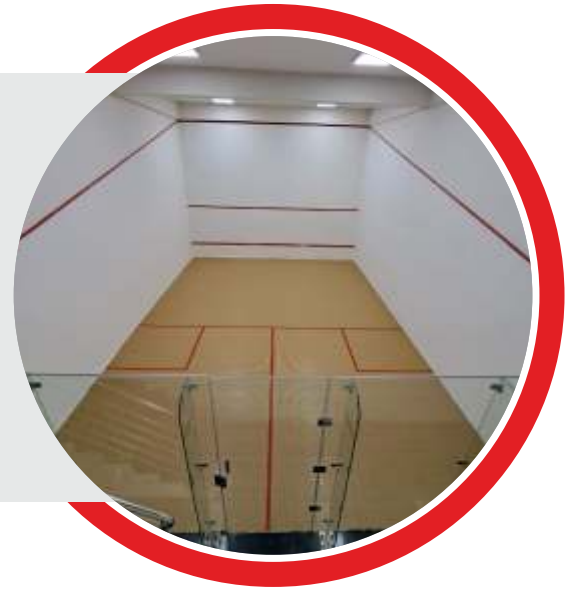

Volleyball

Volleyball requires a well-designed court that offers excellent grip, impact resistance, and durability. We specialize in constructing both indoor and outdoor volleyball courts, ensuring precision in surface leveling, boundary markings, and player safety.

Squash Court

Squash requires a highly responsive and enclosed playing environment. We specialize in constructing premium squash courts with precise dimensions, smooth wall finishes, and high-quality flooring to ensure fast-paced gameplay, durability, and player safety.

Handball

Handball is a dynamic and high-intensity sport that requires a durable and well-constructed playing surface. We specialize in building handball courts using top-quality materials that ensure excellent grip, impact resistance, and player safety.

Pickleball

Pickleball is a rapidly growing sport that demands a well-constructed court with a smooth, durable surface for optimal play. We specialize in designing and building high-quality pickleball courts that offer excellent ball bounce, player comfort, and long-lasting durability.

Cricket Turf

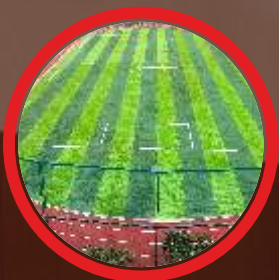

Cricket demands a high-performance playing surface that ensures consistent ball bounce, player safety, and long-term durability. We specialize in constructing world-class cricket turfs, including natural grass wickets, hybrid pitches, and premium synthetic surfaces designed for all-weather conditions.

Flooring Services

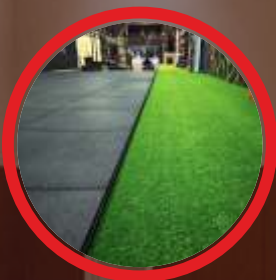

Mahira Group offers a wide range of high-quality flooring solutions designed for sports, recreational, and multi-purpose applications. Our flooring systems ensure durability, safety, performance, and low maintenance.

MULTI **TURF** **FLOORING**

Multi turf flooring is a versatile artificial surface designed to accommodate multiple sports and recreational activities on a single field. It combines durability, shock absorption, and all-weather usability, making it ideal for schools, sports complexes, and community centers. With different pile heights and infill options, multi-purpose turf can be customized to suit a variety of sports, including football, hockey, tennis, and cricket.

KEY FEATURES

- Multi-sport compatibility
- High durability
- All-weather usability
- Low maintenance
- Customizable surface

SPECIFICATIONS

- Pile height
- Infill material
- Drainage system
- UV resistance

APPLICATIONS

- School & college playgrounds
- Multi-sport arenas
- Recreational parks
- Indoor & outdoor sports centers
- Community sports fields

ASTRO TURF

FLOORING

Astro turf flooring is a high-quality artificial grass surface originally designed as an alternative to natural grass for sports and recreational use. It is widely used in football, hockey, tennis, and multi-sport fields due to its resilience, consistent performance, and low maintenance requirements. The surface provides excellent traction, durability, and shock absorption, making it ideal for both professional and recreational sports.

KEY FEATURES

- Natural grass-like feel
- Shock absorption
- All-weather playability
- High durability
- Minimal maintenance

SPECIFICATIONS

- Pile height
- Infill material
- Backing system
- Shock pad
- UV resistance

APPLICATIONS

- Football & soccer fields
- Hockey fields
- Tennis & padel courts
- Cricket grounds
- Multi-sport facilities
- School & college playgrounds

FOOTBALL TURF FLOORING

Football turf flooring is an artificial grass surface designed to replicate the feel and performance of natural grass while offering superior durability and low maintenance. It provides a consistent playing field for both professional and recreational football, ensuring excellent traction, shock absorption, and weather resistance. Modern synthetic turf systems are engineered for player comfort and safety, reducing the risk of injuries while enhancing overall gameplay.

KEY FEATURES

- Natural grass feel
- Shock absorption
- All-weather playability
- High durability
- Low maintenance

SPECIFICATIONS

- Pile height
- Infill material
- Backing system
- Drainage system
- UV resistance

APPLICATIONS

- Professional and amateur football fields
- School and college grounds
- Indoor & outdoor football arenas
- Multi-sport facilities

LAWN **TURF** **FLOORING**

Lawn turf flooring is a premium artificial grass solution designed for landscaping, recreational areas, and low-impact sports. It replicates the natural look and feels of real grass while offering durability, weather resistance, and minimal maintenance. Lawn turf is commonly used in gardens, residential spaces, playgrounds, and commercial areas to create an evergreen, aesthetically pleasing surface.

KEY FEATURES

- Natural appearance
- Soft & comfortable surface
- Weather-resistant
- Low maintenance
- Pet & child-friendly

SPECIFICATIONS

- Pile height: 20mm to 45mm
- Fiber type: Polyethylene

APPLICATIONS

- Residential lawns & gardens
- Commercial landscapes & office spaces
- Parks & public spaces
- Playgrounds & school yards
- Rooftop gardens & balconies
- Poolside & patio areas

WOODEN

FLOORING

Wooden flooring is a premium surface solution widely used in indoor sports facilities due to its durability, aesthetics, and shock absorption properties. It provides a smooth and high-performance playing surface, making it ideal for sports such as basketball, badminton, squash, and other indoor activities.

This type of flooring enhances gameplay by ensuring consistent ball bounce, reducing the risk of injuries through impact absorption, and offering excellent slip resistance. Its natural look also adds a sophisticated and professional appearance to sports and fitness environments.

KEY FEATURES

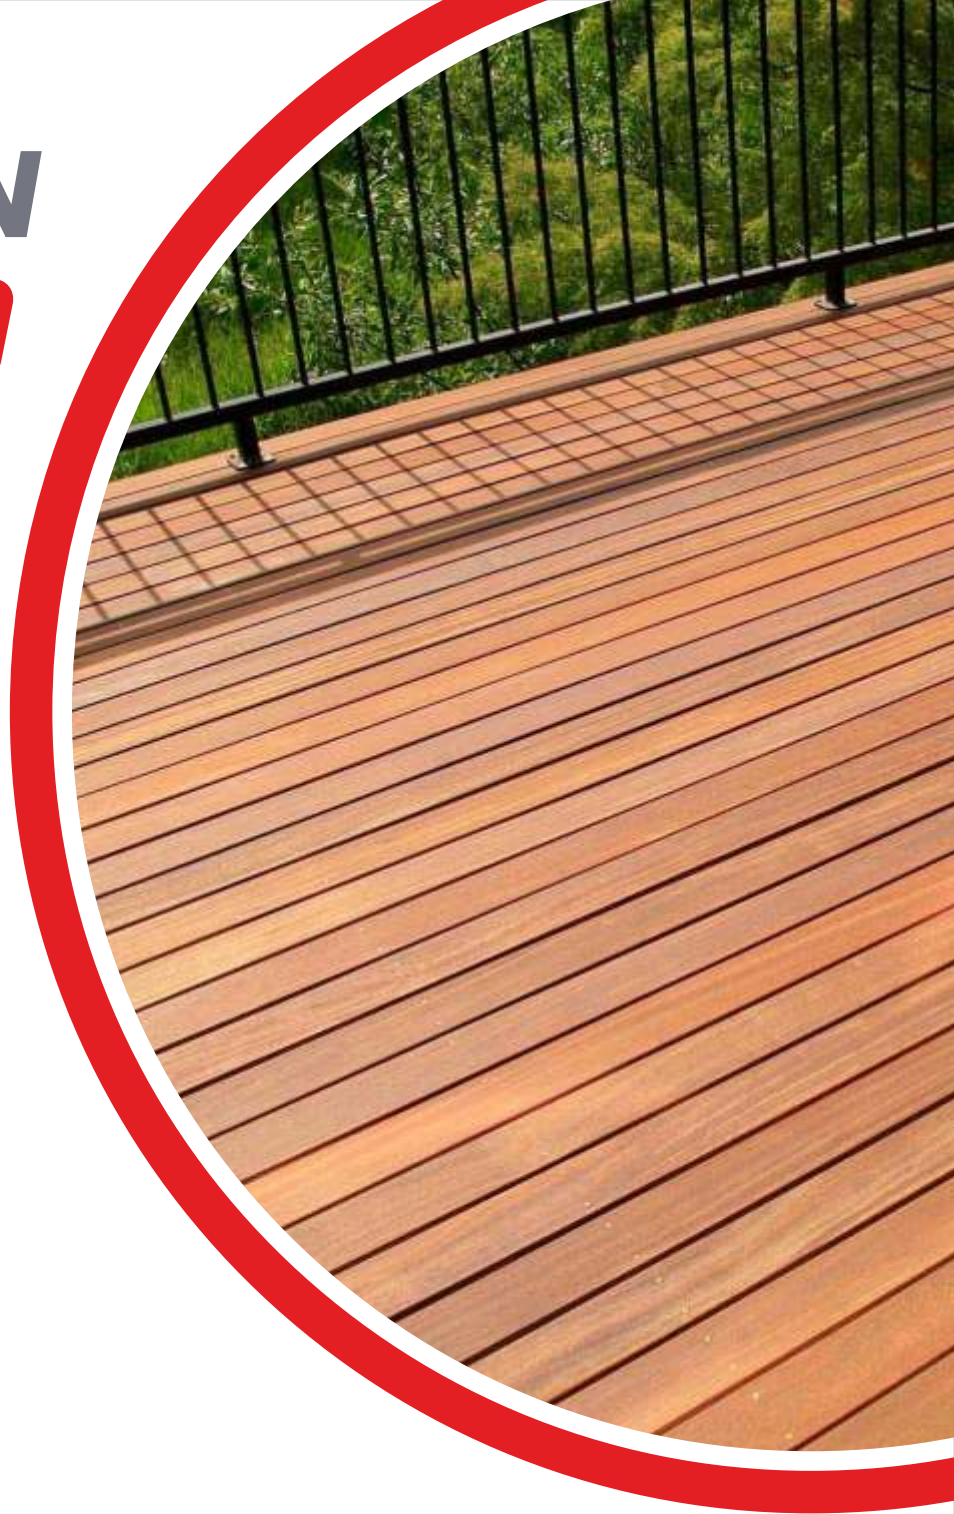

- Superior Shock Absorption – Minimizes impact stress on joints and reduces injuries
- High Durability – Withstands heavy usage and long-term wear
- Optimal Ball Bounce – Ensures consistent and reliable sports performance
- Slip-Resistant Finish – Improves safety during fast movements
- Aesthetic Appeal – Adds a premium and natural visual finish

SPECIFICATIONS

- Material: High-quality hardwood
- Plank Thickness: Typically ranges from 20 mm to 25 mm
- Surface Finish: PU (Polyurethane) or acrylic coatings for protection and performance

APPLICATIONS

- Basketball Courts
- Badminton Courts
- Squash Courts
- Volleyball Courts
- Indoor Gymnasiums & Fitness Centers
- Dance Studios
- Yoga Studios

SYNTHETIC ACRYLIC

FLOORING

Synthetic acrylic flooring is a high-performance and durable sports surface designed for both indoor and outdoor applications. It is widely used for tennis courts, basketball courts, badminton courts, and multipurpose sports areas due to its excellent grip, weather resistance, and low maintenance requirements.

The system consists of multiple layers of acrylic coatings applied over a concrete or asphalt base, creating a smooth, non-slip, and long-lasting playing surface. It ensures consistent performance while maintaining safety and comfort for athletes.

KEY FEATURES

- Low Maintenance – Easy to clean and maintain over time
- Shock Absorption – Reduces impact on joints and muscles
- Excellent Grip – Provides a safe, non-slip playing surface
- Weather Resistant – Suitable for outdoor conditions
- Customizable Colors & Markings – Available in various shades and game line

SPECIFICATIONS

- Base Material: Concrete or asphalt surface
- Surface Thickness: Typically ranges from 2 mm to 5 mm
- Layer Composition: Multi-layer acrylic coating system
- Shock Absorption: Moderate cushioning

APPLICATIONS

- Tennis Courts
- Basketball Courts
- Badminton Courts
- Volleyball Courts
- Multipurpose Sports Arenas

EPDM

FLOORING

EPDM (Ethylene Propylene Diene Monomer) flooring is a high-performance, rubber-based surface designed for durability, safety, and comfort. It is widely used in outdoor and indoor recreational areas such as playgrounds, jogging tracks, and sports zones due to its excellent shock absorption, weather resistance, and slip-resistant properties.

The flooring consists of EPDM rubber granules bound with polyurethane, creating a seamless, cushioned, and long-lasting surface that enhances safety while maintaining visual appeal.

KEY FEATURES

- Slip-Resistant & Safe – Provides excellent grip, even in wet conditions
- High Shock Absorption – Minimizes impact and reduces injury risk
- Weather Resistant – Performs well under extreme heat, rain, and UV exposure
- Low Maintenance – Easy to clean and maintain
- Customizable Design – Available in various colors, patterns, and thickness options

SPECIFICATIONS

- Material: EPDM rubber granules with polyurethane binder
- Surface Thickness: Typically ranges from 10 mm to 50 mm (depending on application)
- Installation Type: Cast-in-situ or tile-based system
- Base: Concrete or asphalt sub-base
- Cushioning: High impact absorption

APPLICATIONS

- Children's Playgrounds & School Yards
- Jogging & Walking Tracks
- Parks & Public Spaces
- Sports & Recreational Areas
- Poolside & Leisure Zones
- Rooftops & Outdoor Fitness Areas

VINYL

FLOORING

Durable & Water Resistant – Suitable for moisture-prone areas

Variety of Designs – Available in wood, stone, and tile finishes

Easy Installation – Options include click-lock, glue-down, and loose-lay systems

Low Maintenance – Simple cleaning and upkeep

Comfortable Underfoot – Softer and quieter compared to hard surfaces

Eco-Friendly Options – Available with recyclable and low-VOC materials

APPLICATIONS

- Residential Spaces (Living rooms, bedrooms, kitchens)
- Commercial Areas (Offices, retail stores)
- Healthcare Facilities
- Educational Institutions
- Hospitality Spaces (Hotels, restaurants)

KEY FEATURES

- Durable & Water Resistant – Suitable for moisture-prone areas
- Variety of Designs – Available in wood, stone, and tile finishes
- Easy Installation – Options include click-lock, glue-down, and loose-lay systems
- Low Maintenance – Simple cleaning and upkeep
- Comfortable Underfoot – Softer and quieter compared to hard surfaces
- Eco-Friendly Options – Available with recyclable and low-VOC materials

SPECIFICATIONS

- Material: Multi-layer composite construction (PVC-based)
- Thickness: Typically ranges from 2 mm to 8 mm
- Wear Layer: Ranges from 6 mils to 40 mils depending on usage level
- Surface Finish: Matte, textured, or embossed finishes
- Installation Types: Glue-down, click-lock, or loose-lay

PP TILES

FLOORING

PP (Polypropylene) Tiles

Flooring is a modular sports flooring system designed for durability, versatility, and ease of installation. It is widely used in both indoor and outdoor sports facilities due to its high performance, weather resistance, and low maintenance requirements.

The interlocking tile design allows for quick installation without the need for adhesives, making it a flexible and cost-effective solution for temporary as well as permanent sports surfaces.

KEY FEATURES

- High Impact Resistance & Durability – Withstands heavy usage and sports activities
- UV-Resistant & Weatherproof – Suitable for outdoor environments
- Interlocking System – Enables quick and hassle-free installation
- Slip-Resistant Surface – Provides enhanced grip and player safety
- Shock Absorption – Reduces stress on joints during play
- Low Maintenance – Easy to clean and maintain

SPECIFICATIONS

- Material: High-quality polypropylene (PP)
- Tile Size: Standard modular sizes (commonly 250 mm × 250 mm or similar)
- Thickness: Varies based on application (typically 12 mm to 20 mm)
- Surface Texture: Anti-skid pattern for improved traction
- Installation: Interlocking modular system (no adhesive required)

APPLICATIONS

- Basketball Courts
- Tennis Courts
- Badminton Courts
- Volleyball Courts
- Multi-purpose Sports Arenas
- Indoor Gym Flooring
- Playgrounds & Recreational Areas

RUBBER

FLOORING

Rubber flooring is a high-performance, resilient surface designed for sports, fitness, and high-traffic environments. Known for its excellent shock absorption, durability, and safety features, it is widely used in gyms, playgrounds, and commercial spaces.

Its ability to reduce impact, noise, and vibration makes it especially suitable for areas with heavy equipment or intense physical activity, while its slip-resistant surface enhances user safety.

KEY FEATURES

- Superior Shock Absorption – Provides excellent cushioning and reduces injury risk
- Anti-Slip & Wear Resistant – Ensures safety and long-lasting performance
- Noise & Vibration Reduction – Ideal for gyms and high-impact activities
- Low Maintenance – Easy to clean and maintain
- Versatile Formats – Available in tiles, rolls, and interlocking systems

SPECIFICATIONS

- Material: High-density rubber (natural or recycled)
- Thickness: Typically ranges from 6 mm to 50 mm
- Surface Finish: Smooth or textured (anti-skid options available)
- Installation: Glue-down, loose-lay, or interlocking systems
- Cushioning: High impact absorption

APPLICATIONS

- Gym & Fitness Centers
- Running Tracks & Sports Courts
- Playground Safety Flooring
- Indoor Sports Arenas
- Commercial & Industrial Spaces

INFRASTRUCTURE

Our facilities are designed to provide a well-rounded environment that supports recreation, fitness, and community living. Each element is thoughtfully planned to ensure comfort, safety, and an enhanced user experience.

Kids Play Area

We design vibrant and safe kids' play areas that encourage active play and joyful experiences. These spaces are thoughtfully created using soft, impact-absorbing flooring and durable play equipment to ensure maximum safety and comfort for children.

Our designs focus on fostering creativity, imagination, and social interaction, allowing children to explore, learn, and have fun in a secure environment. Every play area is carefully planned to combine safety, functionality, and engaging aesthetics.

Club House

We specialize in designing and building modern clubhouses equipped with premium amenities such as lounges, gyms, and recreational spaces. Each clubhouse is thoughtfully crafted to deliver comfort, style, and functionality.

Using high-quality materials and well-planned layouts, we create a luxurious and welcoming atmosphere that enhances the overall experience. Our clubhouses serve as vibrant social hubs, offering the perfect space for relaxation, community engagement, and leisure activities.

Swimming Pool

We design and construct swimming pools using durable finishes and advanced filtration systems to ensure a clean, safe, and hygienic experience. Each pool is crafted to support both relaxation and fitness, featuring smooth surfaces and slip-resistant edges for enhanced safety.

Our thoughtful designs ensure efficient water circulation, easy maintenance, and long-term performance. We create refreshing and visually appealing pool environments that cater to users of all ages.

Sports Arena

We design and build high-performance sports arenas that combine durability, comfort, and functionality. Each arena is developed with advanced infrastructure and premium flooring systems to support a wide range of indoor and outdoor sports activities.

Careful attention is given to lighting, ventilation, and spatial planning to ensure optimal playing conditions and a comfortable experience for both athletes and spectators. The playing surfaces are engineered to provide excellent grip, shock absorption, and long-term durability, enhancing player safety and performance.

Our sports arenas create a professional and dynamic environment that encourages athletic excellence and an engaging spectator experience.

FENCING SERVICES

Mahira Group provides high-quality fencing solutions for sports grounds, play areas, and various other applications, ensuring safety, durability, and a clean professional finish. Our fencing systems are designed to define spaces clearly while enhancing security and overall site appearance.

We use premium materials and reliable installation techniques to deliver long-lasting performance, suitable for both indoor and outdoor environments.

TYPES OF FENCING:

CHAIN LINK FENCING

We provide high-quality chain link fencing solutions known for their strength, durability, and reliable performance. It offers secure boundary protection for sports grounds, playgrounds, and various other enclosed areas.

Our fencing systems are designed to withstand harsh weather conditions, ensuring long-term durability with minimal maintenance. The structure allows clear visibility while effectively maintaining safety and security within the enclosed space.

Ideal for both indoor and outdoor applications, chain link fencing provides a practical and cost-effective solution for defining boundaries and enhancing protection.

NYLON NET FENCING

Nylon net fencing is a lightweight, durable, and weather-resistant solution ideal for sports facilities, play areas, and recreational spaces. It provides excellent flexibility and impact absorption, helping to enhance player safety during active use.

The material is resistant to UV rays and moisture, ensuring long-term strength and performance even in outdoor conditions. With easy installation and low maintenance requirements, nylon net fencing is a practical and cost-effective solution for secure boundary protection.

SPORTS EQUIPMENT

Sports equipment encompasses a wide range of products used for physical activity, training, and competitive sports. It caters to diverse requirements, from team sports and fitness training to outdoor recreation and recreational activities.

Driven by growing health awareness and continuous advancements in sports technology, modern equipment is designed to enhance performance, safety, and user experience across all levels of play.
